# PROJECT ASSESSMENT

GemPad has conducted a thorough and meticulous evaluation of the project "Strike Protocol". Our process involved an initial data review of information available on their website and socials, followed by live interviews with the project team and later fact-checking all the information gathered. The evaluation covered 12 crucial categories to ensure quality, authenticity, and compliance.

After this thorough review, we're delighted to confirm that Strike Protocol met or exceeded GemPad's strict criteria. The project showcased an unwavering commitment to transparency and responsiveness throughout the vetting process. The team didn't hesitate to provide all necessary information promptly and exhibited flexibility in adapting to necessary changes for a successful outcome.

The Strike Protocol team's commitment and passion for their work are highlighted as they've prioritized the development of the game first before having any fundraising for the token, clear signs that they're building the game for the community. The team is competent and well-versed in the space, based on their achievements and experience.

Based on all the information we've gathered, we proudly award Strike Protocol the **VETTED Badge**, a testament to the project's dedication to maintaining high standards of quality, authenticity, and compliance.

This public document was finalized on the 18th of March 2024, we would like to congratulate the Strike Protocol team on their successful completion of the vetting process. We eagerly look forward to continuing our engagement with the project and monitor closely its progress.
